

① “一”：stddevX 远大于 stddevY，无倾斜

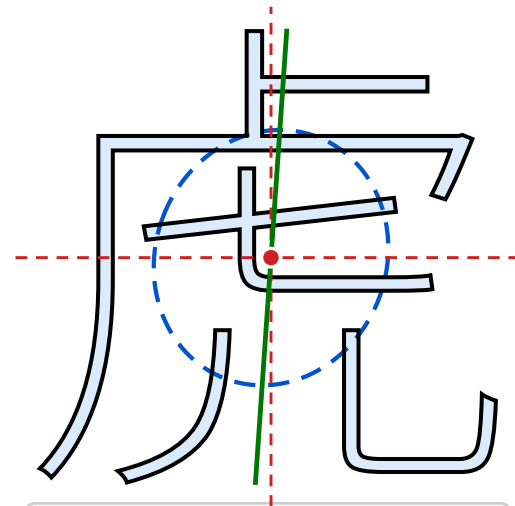

```
area    = -29865
mean    = (502.5, 390.5)
stddev  = (261.3, 9.5)
corr    = +0.0000
slant   = +0.0000
```

② “/”：correlation 接近 +1，slant 为正

```
area    = -33051
mean    = (200.4, 300.7)
stddev  = (101.4, 276.5)
corr    = +0.9952
slant   = +0.3648
```

③ “虎”：结构复杂，相关性接近 0

```
area    = -119033
mean    = (505.8, 376.3)
stddev  = (234.8, 255.7)
corr    = +0.0754
slant   = +0.0692
```

字形填充区域（统计对象，按面积矩计算）

±1σ 协方差椭圆

质心 (meanX, meanY)

拟合直线（斜率 slant）

数值框为各统计量的实测结果；area 带符号，TrueType 顺时针外轮廓为负值
